

# Planning Process for Highways 165/99 Improvements

You are invited to learn about a proposed project to reduce traffic congestion and increase safety along Highway 165.

Merced County, Merced County Association of Governments (MCAG), Stanislaus County, Stanislaus Council of Governments (STANCOG), and the City of Turlock are working with Caltrans to develop a report (Project Study Report) that will look at traffic deficiencies, potential improvements, the possible realignment of Highway 165 and/or the building of a new interchange with Highway 99. We would greatly appreciate your comments and suggestions on what should be included in the report.

Please attend the open house meeting to learn about the project and share your ideas for potential improvements.
