

Request:

\$1,750,000 for Atwater Youth Center rehabilitation and improvements.

Description:

The City of Atwater took possession of the Castle Youth Center after the Military decommissioned Castle Air Force Base in 1993. At that time, the city was able to do a minor renovation to the facility. Unfortunately, due to budgeting the Center has remained in almost the same condition as it was in the 90's with few upgrades.

Necessity:

The current youth center is no longer functional or usable as a public facility due to many compounding factors. Several of the doors no longer meet ADA requirements, the flooring is worn and unsafe for use and the facilities no longer meet the environmental support to operate as a public facility.

Rehabilitation and Improvements:

Plans for rehabilitation and improvements include making the building accessible, safe, functional, and provide an environment for local youth to engage in physical activities and offering educational opportunities.

Beneficiaries:

- Local Youth
- Local Parents
- County of Merced
